insta- KLEEN™

The Severe-Duty Drive-Thru Car Wash

The insta-KLEEN™ fits into bays as short as 25 feet – even an existing service bay, for maximum flexibility

'Porter Proof' side wash wheels are "Built to Tilt"™ through a full 360°, using a patented oversized socket joint

The Quad Wave Mitter™ washes vehicle fronts, tops & backs – for a full-size clean in only 7 feet of bay space

The insta-KLEEN™ by Belanger is a severe-duty, drive-thru car wash system designed with the needs of car dealers, rental car agencies, and other fleet customers in mind. Based on Belanger's industry-leading *Legend by Belanger* tunnel line, the field-proven insta-KLEEN draws on decades of engineering know-how to create the simplest, most rugged wash system possible.

Built on the strength of our aircraft-grade aluminum framework, the insta-KLEEN stands the test of time with a minimum of moving parts. Where motion is required, the insta-KLEEN relies on automotive-rated bearings or lube-free pivot points – for minimal maintenance needs and easy servicing.

Unlike 'rollover' systems that must move the entire wash unit over each vehicle, making multiple passes up and down floor-mounted 'train tracks,' the insta-KLEEN framework is a pillar of strength that remains in place for the ultimate in structural integrity.

Unmatched Throughput – A Clean Car Every 60 Seconds

Of course, cars are designed to move – and do so in a highly controllable way. The insta-KLEEN leverages this fact, standing ready to wash any vehicle driven through its guiderails. This drive-thru wash format is unparalleled in its throughput – commonly delivering a clean car every 60 seconds.

Simply put, with the insta-KLEEN, 'if you can drive the car, you can wash it.' Any employee can wash cars as needed – whether it's a salesperson, mechanic or porter – with a minimum of training. And because the wash takes only 60 seconds, the payroll expense is both minimal and well-distributed.

Cuts Utility & Maintenance Costs

Since the insta-KLEEN doesn't move over the car, there is no wasted motion – and its electrical use is lower than any rollover. In fact, the entire system can use as little as 4 HP of electrical power.

Water use is less, too – since the insta-KLEEN is designed to clean in a single pass. Unlike rollovers that must make multiple passes over the vehicle, the insta-KLEEN is built to wash the car effectively in one shot – using as few as 20 GPM of water total (and as little as 6 GPM of fresh water).

What's more, the 'wear parts' on the insta-KLEEN are all bolt-on items that are designed for easy accessibility, simple maintenance, and expedient replacement as needed – thereby preserving the structural components for a lifetime of positive returns on your car wash investment.

Wash Cars Your Way

Optional customizations include:

- Correlator (above or in-ground)
- DuraTrans® XDW Conveyor
- Prep Jet
- Presoak Arch
- Blaster Arch
- Wave Low Side Washer™
- Whisper Wheel® (top brush)
- DuraScrubber® (tire cleaner)
- Water Reclaim System
- Spot-Free Rinse
- Soft-Start Motor Controls
- Dryers

Cuts utility expenses and eliminates hydraulic system maintenance, with efficient electric drive on all components

Saves water, using as little as 20 GPM total (and as little as 6 GPM of fresh water) with its drive-thru format

Benefit from phone-based technical support, with extended on-call availability from our factory technicians

Trusted Since 1969

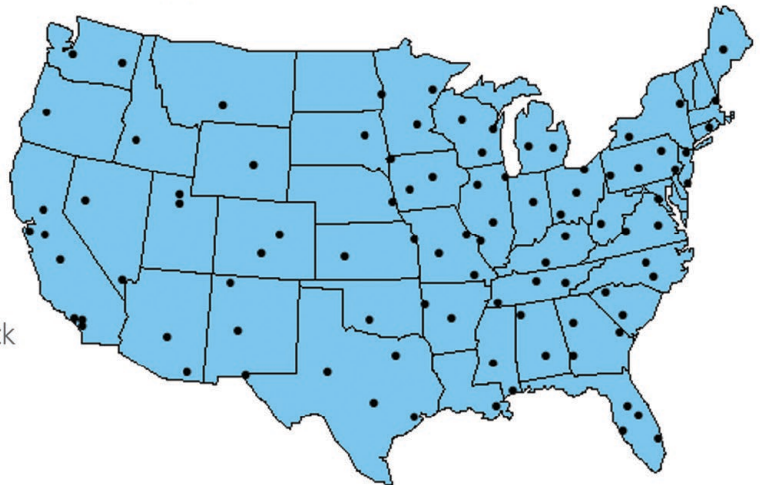

Whether you're a seasoned car wash operator or a first-time investor, one thing is true: The equipment you select for your wash will have a major impact on your business's success. Your equipment needs to clean cars to the standards that customers demand. The equipment you choose should work to support your marketplace's washing preferences, meeting the needs of your customers, and your business, at your location.

As a full-line equipment manufacturer, Belanger makes more types of vehicle washes than anyone else – including conveyorized tunnels, touchless and soft-touch in-bay automatics, drive-thru fleet, and cargo van systems. Which means we'll work with you on the best format for your location's success – not push a 'one size fits all' approach.

'World-Class' Support Starts With Your Local Service Provider!

Let's face it – vehicle washing is not your core business. Yet you need a reliable, cost-effective way to clean cars – to ensure high customer satisfaction and promote your business image. Your solution starts with thoughtfully designed, well-made wash equipment – and continues with an equipment manufacturer who will be there for you before, during, and after the sale.

In order to keep your wash running – and your cars looking their best – Belanger has established an extensive network of experienced, professional service providers that cover North America and select global locations. These providers understand vehicle washing, are factory trained and authorized to service your equipment, and are available for quick response in your area, whenever you need them.
